

Forth Region Compass Update March 2016

What is Compass?

Compass is a powerful set of online tools for **Members** to manage their Scouting administrative activities in one place. **The phased re-introduction will soon be complete** and all members will have their own accounts. Further information can be found using the [Compass Updates](#) link. For those of you who used Compass when it was first launched there should not be many changes with the screens however updated User Guides will be available in addition to local support.

Compass's functionality, in addition to supporting the Group and Section leaders, provides functionality across all roles in The Scout Association (TSA). Functions to be released will allow Members (dependent on their role) to:

- View their personal profile
- Search for other adult members
- Add adult members
- Add roles to new and existing members
- View Reports
- View and amend their scouting hierarchy (add sections to their Group etc)
- Adult training
- Permits and Authorisations

Please note restored Compass will initially only support **adult records**.

How will Compass users be supported?

There has been a phased roll out of Compass and it is important that Members read HQ and local Communications.

Superusers have been appointed who will support the roll out however as this is a short term role it is important that actions required by Members are completed as required.

Superusers have been appointed as follows

		Contact Number	EMail
Forth Region	Leonard Jamieson	07990822368	lenny@frscouts.org.uk
Clackmannanshire	Loes McEwan	07887568914	loesjmcewan@talktalk.net
Stirling & Trossachs	Rosemary Fletcher	01786465182	rosemary@coxithill.freemove.co.uk

Members have been given access according to their role.

Support Materials

A range of support resources are being developed to assist different roles in using Compass. These are available from scouts.org.uk/compass. As well as Members should ask the appropriate Superuser if the need further assistance.

A range of reports are available to managers during the roll-out process. In addition a range of new reports will be made available as the phases are implemented.

Data Protection
